

## Junior Technologist Position at Belle & Wissell, Co.

Belle & Wissell ([www.bwco.info](http://www.bwco.info)) is an award-winning studio based in Seattle, creating participatory experiences that blend inventive design and technology—for museums, attractions, universities, and branded environments.

### RESPONSIBILITIES:

We are looking for a curious, highly-flexible individual (with a passion for technology) to join our hybrid design and technology team. In this role, you can expect to quickly expand your skillset of production level skills in a wide range of programming languages, software platforms, and A/V hardware.

Efficient problem-solving and excellent customer service skills are key as you will be assisting with on-site and remote client-facing installation, configuration, troubleshooting and repair of computer hardware, operating systems, and bespoke software—with some duties outside of regular work hours.

This role will include reverse-engineering existing project code bases, providing code fixes in a wide variety of programming languages and platforms, as well as writing technical documentation.

### QUALIFICATIONS:

- 2+ years of relevant work experience (past collaborations with designers is a plus) or a 4-year college degree in a related field is required.
- Demonstrated ability to quickly write code as part of a client-facing project.
- Strong fluency in Windows OS (Mac OS or Linux a plus).
- Familiarity and fluency in a wide range of programming languages and platforms, including but not limited to Javascript, PHP, Actionscript 3, ASP .NET, C#, and Arduino.
- Familiarity with computer hardware configuration for A/V installation.
- Interest and knowledge with trends in new A/V hardware is a plus.
- Familiarity with source control systems such as Git or Subversion also a plus.
- Ability to occasionally lift up to 50 pounds (to help team moving A/V hardware or installing client prototype gear).

This is a full-time, salaried position with a suitable benefits package. Salary will depend on the experience of the applicant.
